M. Davis

Editorial Board

G. M. Cox, H. A. David, M. Davis, G. G. Duarte, I. Juvanez, A. Linder, E. Marubini, C. L. Rümke, B. Schneider, P. Smets, R. Tomassone, E. Weber, E. J. Williams, M. E. Wise.

Former Editors

Gertrude M. Cox (1945–55—*Founding Editor*
John W. Hopkins (1955–7)
Ralph A. Bradley (1957–62)
Michael R. Sampford (1962–7)
Herbert A. David (1967–72)
Franklin A. Graybill (1972–5)

Published quarterly by the BIOMETRIC SOCIETY

EDITORIAL OFFICE OF *BIOMETRICS:* Correspondence about editorial matters should be sent to the Editor Foster B. Cady, Biometrics Unit, 337 Warren Hall, Cornell University, Ithaca, New York 14853, U.S.A.

BUSINESS OFFICE: All correspondence about subscriptions, single copies, changes of address, claims for missing issues, and membership should be sent to the Business Manager. Biometrics Business Office, P.O. Box 5962, Raleigh, North Carolina 27607, U.S.A. Members of the Biometric Society should also advise their respective Regional or National Secretaries (for addresses, see page ix) of changes of address to insure receipt of notices of meetings, ballots, and all dues notices.

Second-class postage paid at Richmond, Virginia. Biometrics is published quarterly—in March, June, September, and December.

CONTENTS OF VOLUME 32

PART 1 (March 1976)

The analysis and selection of variables in linear regression ..... R. R. Hocking 1
The comparison of several response functions with a standard ..... D. R. Jensen 51
Estimation of parameters for a model of transmitter release at synapses ..... J. Robinson 61
A simple method for computing the inverse of a numerator relationship matrix used in prediction of breeding values ..... C. R. Henderson 69
Parameter estimation in studying circadian rhythms ..... Y. L. Tong 85
Anologies between multiplicative models in contingency tables and covariance selection . N. Wermuth 95
Multivariate matching methods that are equal percent bias reducing, I: Some examples . . D. B. Rubin 109
Multivariate matching methods that are equal percent bias reducing, II: Maximums on bias reduction for fixed sample sizes ..... D. B. Rubin 121
The analysis of contingency talbes with incompletely classified data ..... T. Chen and S. E. Fienberg 133
Data analysis problems in the area of pharmacokinetics research ..... B. K. Shah 145
Estimating mean time to reach a milestone using retrospective data ..... C. Atwood and A. Taube 159
Selection for direct, maternal and grandmaternal genetic components of economic traits L. D. Van Vleck 173
Shorter Communications
An exact test of the Hardy-Weinberg Law ..... W. Chapco 183
A note on the construction of mutually orthogonal latin squares . . . B. S. Boob and H. L. Agrawal 191
On the selection of designs for comparative experiments ..... G. H. Freeman 195
Correspondence 200
Abstracts 202
The Biometric Society 205
News and Announcements 209
Papers to be published in Biometrics 212

PART 2 (June 1976)

Science, statistics and paired comparisons ..... Ralph A. Bradley 213
Discussion ..... R. J. Beaver, H. A. David and R. R. Davisdon 233
A bibliography on the method of paired comparisons ..... R. R. Davidson and P. H. Farquhar 241
Model search among multiplicative models ..... N. Wermuth 253
Fisherman's luck ..... W. A. Thompson, Jr. 265
Composite sampling ..... C. A. Rohde 273
Design of experiments to estimate heritability when observations are available on parents and offspring R. Thompson 283
Models allowing for age-dependent survival rates for band return data . . C. Brownie and D. S. Robson 305
Mathematical models for nonparametric inferences from line transect data K. P. Burnham and D. R. Anderson 325
An application of the clumped binomial model to the analysis of clustered attribute data G. A. Koch, H. D. Tolley and J. L. Freeman 337
A statistical model of the dynamics of a mosquito vector (*Culex tarsalis*) population ..... T. E. Moon 355
Optimizing the enzyme—labeling of antibody ..... P. G. Archer 369
Estimating the rate constants in a two-compartment stochastic model . . R. L. Kodel and J. H. Matis 377
A test for randomness ..... P. C. O'Brien 391
Shorter Communications
Confidence intervals and sets for linear combinations of fixed effects ..... D. A. Harville 403
Regression analysis of the log odds ratio ..... N. Breslow 409
A preliminary test for discriminant analysis based on small samples L. L. McDonald, V. W. Lowe, R. K. Smidt and K. A. Meister 417
Power spectrum of the respiratory system . . E. L. Frome, E. I. Frederickson and C. C. Lushbaugh 423
The analysis of ranked data derived from completerly randomized factoral designs C. J. Scheirer, W. S. Ray and N. Hare 429
Stability of population growth determined by 2×2 Leslie matrix with density dependent elements D. Cooke and J. A. Leon 435
A note on the general time-dependent stochastic compartmental model ..... M. J. Faddy 443

Expectations for inbreeding depression on self-fertilization of tetraploids ..... J. H. Bennett 449
Combining estimates of category and subcategory proportions in a mixed population ..... G. H. Brown 453
Reanalysis of some baboon descent data ..... J. H. Ware and D. L. DeMets 459
An approximation to the maximum modulus of the trivariate t with a comparison to the exact values ..... J. D. Dutt, K. D. Mattes, A. P. Soms and L. C. Tao 465
A generalization of a matrix occupancy problem ..... S. D. Walter 471
Maximally-invariant quadratic unbiased estimators ..... J. H. Goodnight 477
Maximum gain in the two-stage classification procedure ..... M. A. Zielezny 481
Correspondence 485
Book Reviews 490
Abstracts 495
The Biometric Society 497
News and Announcements 502
Papers to be published in Biometrics 504

PART 3 (September 1976)

Extended complete block designs with correlated observations ..... J. F. Schreckengost and J. A. Cornell 505
Incomplete block designs for three or four replicates of many treatments ..... G. H. Freeman 519
A criterion for selecting variables for the linear discriminant function ..... G. J. McLachlan 529
Stochastic model of metastases formation ..... L. A. Liotta, G. M. Saidel and J. Kleinerman 535
A stochastic model for censored-survival data in the presence of an auxiliary variable ..... S. W. Lagakos 551
A generalization of the one-sided two-sample Klomogorov-Smirnov statistic for evaluating diagnostic tests ..... M. H. Gail and S. B. Green 561
Probleme der Auswahl geeigneter Zuordnungsregeln bei unvollständiger Information, insbesondere für kategoriale Daten ..... N. Victor 571
Life tables with concomitant information ..... T. R. Holford 587
Use of the logistic model in retrospective studies ..... R. Prentice 599
The efficiency of the multiple trial randomized response technique ..... P. T. Liu and L. P. Chow 607
Comparing the joint agreement of several raters with another rater ..... G. W. Williams 619
Applications of methods of testing for independence between two Markov chains ..... R. L. Sandland 629
Testing for a single outlier from a general linear regression ..... J. H. Ellenberg 637
Properties of diagnostic data distributions ..... A. P. Dawid 647
Statistical analysis of spatial point patterns by means of distance methods ..... P. J. Diggle, J. Besag and J. T. Gleaves 659
Shorter Communications
The lagged normal family of probability density functions applied to indictor-dilution curves ..... G. C. Davis, Jr. and M. H. Kutner 669
Cross-validatory choice of weights for inter- and intrablock estimation in balanced incomplete block designs ..... L. Jensen and M. Stone 677
The comparison of parameters estimated from several different samples by maximum likelihood ..... H. D. Quednau 683
On the equivalence of two tests for testing hypotheses about two correlated proportions ..... P. P. Vitaliano 689
On the use of Pocock and Simon's method for balancing treatment numbers over prognostic factors in the controlled clinical trial ..... L. S. Freedman and S. J. White 691
Skewness in commingled distributions ..... C. J. MacLean, N. E. Morton, R. C. Elston and S. Yee 695
Correspondence 700
Book Reviews 701
Abstracts 706
The Biometric Society 714
News and Announcements 717
Papers to be published in Biometrics 719

PART 4 (December 1976)

Radioligand assay ..... D. J. Finney 721
Symmetrical confidence intervals for bio-equivalence trials ..... W. J. Westlake 741

On the absorption probabilities and absorption times of finite homogeneous birth-death processes
W. Y. Tan 745
On testing normality using several samples: an analysis of peanut aflatoxin data
C. P. Quesenberry, T. B. Whitaker and J. W. Dickens 753
A generalization of the probit and logit methods for dose response curves ..... R. L. Prentice 761
Estimation for an epidemic model ..... N. Becker 769
A comparison of variance component estimators ..... R. R. Corbeil and S. R. Searle 779
Invariant quadratic estimators in the random, one-way ANOVA model ..... L. R. LaMotte 793
Lung cancer incidence in cigarette smokers: further analysis of Doll and Hill's data for British physicians ..... A. Whittemore and B. Altshuler 805
Generalizations of two tests for the detection of household aggregation of disease
P. G. Smith and M. C. Pike 817
The estimation and interpretation of attributable risk in health research ..... S. D. Walter 829
Graphical exploration in comparing variance matrices ..... L. C. A. Corsten and K. R. Gabriel 851
Even point estimation and moment estimation in hermite distribution ..... Y. C. Pastel 865
Order statistics for a special class of unequally correlated multinormal variates ..... J. O. Rawlings 875
Order statistics of correlated variables and implications in generic selection programmes ... W. G. Hill 889
The estimation of maternal genetic variances ..... R. Thompson 903
A discrininant analysis approach to the identification of human chromosomes ..... J. D. F. Habbema 919
Shorter Communications
Some new multiple comparison procedures for the two-way AOV model with interaction
D. E. Johnson 929
Binary regression with unreplicated data ..... T. J. Orchard 935
An optimum nested procedure in binomial group testing ..... F. K. Hwang 939
Optimal sustainable yield of a renewable resource ..... C. Rorres 945
Computing the diagonal elements and inverse of a large numerator relationship matrix
R. L. Quaas 949
